

Myrrh Coffee Table | Natural White

The Myrrh Outdoor Coffee Table brings sculptural form to both indoor and outdoor spaces. Crafted from natural white concrete, its elongated top is grounded by four distinctive spiral-form legs, creating a strong architectural silhouette softened by organic curves.

Generously proportioned, Myrrh is designed for open and expansive spaces, providing ample surface area for gathering, entertaining and relaxed social settings.

The natural concrete finish celebrates the inherent character of the material, with subtle variations in tone, texture and surface markings making each piece unique. These natural characteristics are not considered imperfections, but an integral part of the table's organic appeal.

Suitable for both indoor and outdoor use, Myrrh makes a substantial yet refined statement in large living spaces, terraces, courtyards and gardens.

Assembly required (table top and legs).

- Product Details:
- Cast concrete construction
 - Adjustable feet for stability
 - Designed for outdoor use
